

## Automated alarm notifications and data reports for effortless monitoring of blood/plasma/platelets storage

### Visibility

A single platform to monitor temperature ranges in all your refrigerators, freezers, deep freezers, and cryo storage

### Automation

Use the CX5000 Gateway for data download reports and immediate text/email notifications of critical alarms via cloud-based InTempConnect

### Ease-of-Use

Automated logger programming, data collection, and reporting means less time spent on setup and compliance

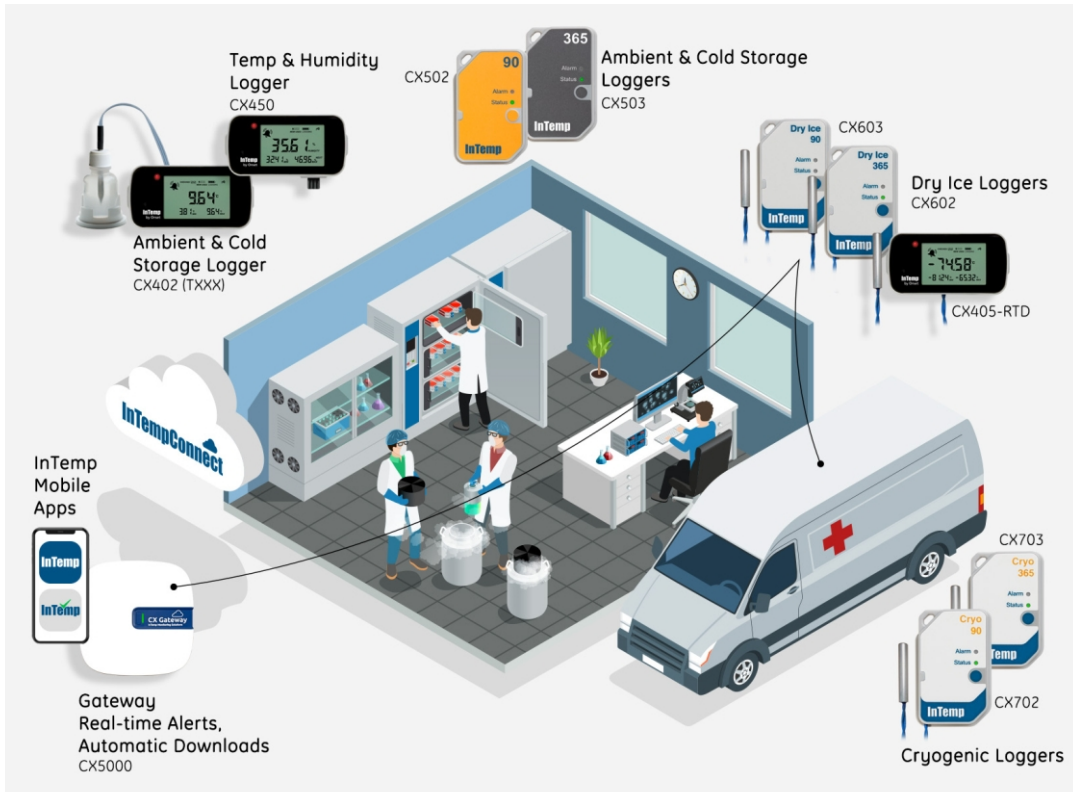

### Reporting

Use data tags to easily identify problematic storage units, and to organize/group logger data for advanced customized reporting

### Compliance

Comprehensive 21 CFR Part 11 compliant solution with NIST calibrated loggers, and secure data storage and transmission

## Automation

Gain visibility into all your blood/plasma/platelets storage units with automatic excursion alerts and data reports.

### Preprogrammed data downloads

Program the CX5000 Gateway to automatically download data at specified intervals when loggers are within 100 feet.

### Always informed

Using the CX5000 Gateway and InTempConnect, enable automatic email and/or text notifications to immediately inform you of critical excursion alarms and receive reports via email upon all data downloads.

### Automatic programming for greater efficiency

Program logger to start the logger at origin/shipping location, download data in transit using Gateways, and stop the logger at destination.

## Cloud Reporting

Make critical product-disposition decisions quickly to reduce product loss. Flexible, secure reports provide the data you need, when you need it.

### Crucial decisions, made on time

Rely on automated reports after an excursion occurs and make effective, timely product-disposition decisions.

### Clear, organized reports

Gather data from individual sites – from a local to global level – and build clear, organized reports.

### Customized reporting that meets your needs

Create custom automated reports for quality assurance (QA) and regulatory auditing to ensure the safety and efficacy of your pharmaceutical and medical goods.

**DATA LOGGER**

**InTemp Bluetooth Temperature (with Probe) Data Logger**

InTemp CX402-xxM (with Probe only) data loggers monitor temperatures in refrigerators, freezers, and other temperature...

**DATA LOGGER**

**InTemp CX405 RTD Dry Ice Data Logger**

The InTemp CX405-RTD Dry Ice data logger is specifically designed for ultra-low temperature monitoring of vaccines and...

**DATA LOGGER**

**InTemp Temp/Relative Humidity Data Logger**

The InTemp CX450 Temp/RH data logger monitors temperature and relative humidity in storage and transportation...

**DATA LOGGER**

**InTemp Bluetooth 90 Day Single-Use Temperature Data Logger**

The InTemp CX502 Bluetooth data logger is a single-use logger that records temperature data for up to 90 days. Designed...

**DATA LOGGER**

**InTemp Bluetooth 365 Day Multiple-Use Temperature Data Logger**

The InTemp CX503 Bluetooth data logger is a multiple-use logger that records temperature data for up to a year. Designed...

**DATA LOGGER**

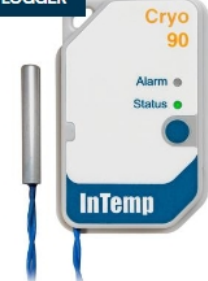

**InTemp Dry Ice Logger - Single Use Data Logger**

The InTemp CX602 Dry Ice data logger is a Bluetooth-enabled single-use logger that records temperature data for up to 90...

**DATA LOGGER**

**InTemp Dry Ice Logger - Multiple Use Data Logger**

The InTemp CX603 Dry Ice data logger is a Bluetooth-enabled multiple-use logger that records temperature data for up to...

**DATA LOGGER**

**InTemp Cryogenic Logger - Single Use Data Logger**

The InTemp CX702 Cryogenic data logger is a low-cost Bluetooth-enabled single-use logger that records temperature data...

**DATA LOGGER**

**InTemp Cryogenic Multiple Use Data Logger**

The InTemp CX703 Cryogenic data logger is a low-cost Bluetooth-enabled multiple-use logger that records temperature data...

**COMMUNICATION**

**InTemp CX Gateway**

Never miss downloading temperature data for your critical temperature-sensitive shipments! The CX Gateway saves you time by eliminating the need to remove loggers to download data by linking our data loggers seamlessly to InTempConnect's cloud-based software that sends alarms and more.
