

“Touchless” monitoring solutions that easily integrate with existing CRO,  
Direct-to-Patient, and specialty courier processes

### Shipments

Create shipments in the InTempConnect cloud-based system and easily track essential clinical trial data

### Compliance

Comprehensive 21 CFR Part 11 compliant solution with NIST calibrated loggers & 1-year calibration certificate, and secure data storage and transmission

### Reporting

Create custom reports to see the exact data you need, from first to last mile

### Automation

Automate data downloads and alerts with the CX5000 Gateway to the cloud so you can notify stakeholders of any excursion automatically via email/text

## Shipment Visibility

Gain visibility into environmental conditions from product storage to last mile/Direct-to-Patient

### In the know, all the way

With InTemp's mobile app, when within 100 feet of a logger, you can view temperature and relative humidity data in real time at multiple waypoints throughout the shipping process

### Better efficiency through automation

Add the CX5000 Gateway for automatic logger programming and downloading, and receive reports when the device downloads and stops a logger.

### Fast, easy data downloads

Get quick, simple data downloads for records retention with our app, or automate the process with the optional CX5000 Gateway.

## InTemp Shipment Monitoring App

Monitor shipments along the waypoints with InTemp's wireless mobile app.

### Real-time data

Check temperatures of shipments, even unopened, when within 100 feet of InTemp loggers.

### Logger naming to track multiple shipments

Designate unique logger names to quickly identify which loggers belong to which shipment.

### In-transit data downloads that keep you informed

Use the InTemp mobile app to download data at waypoints and when critical alarms occur.

### Data sharing for those who need to know

Let last-mile customers and patients view data at delivery's end.

### Data tagging for essential information

Create custom data tags for essential clinical trial information (patient ID, trial number, drug name, etc.) to include with temperature data.

**DATA LOGGER**

**InTemp Bluetooth 90 Day Single-Use Temperature Data Logger**

The InTemp CX502 Bluetooth data logger is a single-use logger that records temperature data for up to 90 days. Designed...

**DATA LOGGER**

**InTemp Bluetooth 365 Day Multiple-Use Temperature Data Logger**

The InTemp CX503 Bluetooth data logger is a multiple-use logger that records temperature data for up to a year. Designed...

**DATA LOGGER**

**InTemp Dry Ice Logger - Single Use Data Logger**

The InTemp CX602 Dry Ice data logger is a Bluetooth-enabled single-use logger that records temperature data for up to 90...

**DATA LOGGER**

**InTemp Dry Ice Logger - Multiple Use Data Logger**

The InTemp CX603 Dry Ice data logger is a Bluetooth-enabled multiple-use logger that records temperature data for up to...

**DATA LOGGER**

**InTemp CX405 RTD Dry Ice Data Logger**

The InTemp CX405-RTD Dry Ice data logger is specifically designed for ultra-low temperature monitoring of vaccines and...

**DATA LOGGER**

**InTemp Cryogenic Logger - Single Use Data Logger**

The InTemp CX702 Cryogenic data logger is a low-cost Bluetooth-enabled single-use logger that records temperature data...

**DATA LOGGER**

**InTemp Cryogenic Multiple Use Data Logger**

The InTemp CX703 Cryogenic data logger is a low-cost Bluetooth-enabled multiple-use logger that records temperature data...

**DATA LOGGER**

**InTemp Temp/Relative Humidity Data Logger**

The InTemp CX450 Temp/RH data logger monitors temperature and relative humidity in storage and transportation...
