MIR Spiro™ android iOS

Simple and intuitive App for Spirometry and Oximetry test directly on your Tablets

A smarter way to perform spirometry!
Maximum ease of use in primary care

An expert beside you

Highly innovative **Virtual Assistant** supporting the operator before, during and after the spirometry test with four main functions:

- ✔ didactic guide with recommendations for the correct execution of the test
- ✔ identification of the cause of errors during test execution
- ✔ suggestions both for the operator and for the patient to make an acceptable test
- ✔ automatic test interpretation

Sharing is caring

Changing our software experience, direct and simple as a tap, test can be printed, exported in pdf and sent by email.
The recorded data can be transferred in HL7 format to a web service for archiving tasks or for second opinions and are enabled for **EMR access**

MIR Spiro is an App for iPad, iPad mini, Android Tablets
